

2013

To Whom It May Concern:

3M has not prepared a Material Safety Data Sheet (MSDS) for graphic films; they are defined as Articles, in accordance with Occupational Safety and Health Administration's Hazard Communication Standard (29 CFR 1910.1200 (b)(6)(v)):

"Article" means a manufactured item other than a fluid or particle:
(i) which is formed to a specific shape or design during manufacture;
(ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical, and which does not pose a physical hazard or health risk to employees.

When used under reasonable conditions and in accordance with the 3M directions for use, the products should not present a health and safety hazard. However, use or processing of the product in a manner not in accordance with the directions for use may affect its performance and present potential health and safety hazards.

If you have additional questions, please contact Diane Clifton at 651-737-3600.
