## 3M DI-NOC

Revolutionizing the union of design and technology, 3M™ DI-NOC™ Architectural Finishes marry innovative aesthetics and sophisticated design. Utilizing proprietary 3M technology, the dynamic DI-NOC films have the unique ability to conform to a variety of flat or curved surfaces, refreshing walls, doors, panels, ceilings, furniture and virtually any other surface.

The 3M DI-NOC collection offers over 800 patterns, including decorative metal, sophisticated stone, luxurious wood, pure solids and abstract designs. This versatile material is able to take on almost any surfacing challenge. In the latest launch, a new range of patterns has been added enabling application to exterior surfaces.

The 3M DI-NOC collection allows surfaces to be refinished on site, and thus extends the useful life of architectural and design elements. Offering infinite design possibilities, 3M DI-NOC transforms spaces with less downtime, less labor and less waste.

DesignTex is proud to collaborate with 3M as the exclusive distributor for DI-NOC in the United States, since the two companies share a commitment to materials innovation and great design.

## Standard Interior and Whiteboard Finishes

3M DI-NOC Architectural Finishes for interior use range from exotic and reclaimed woods, to rich marbles and sophisticated concretes, to bright, bold hues, brushed metallics and sumptuous leathers.

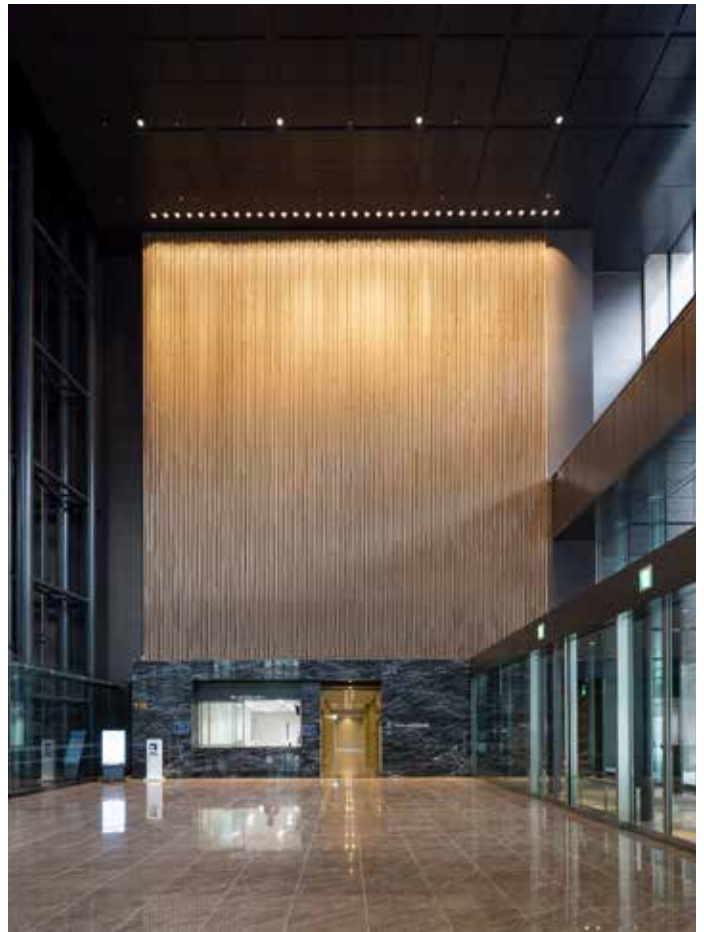

The diverse selection of new patterns utilizes the latest technologies available, including Effect, which changes color depending on the viewing angle, and Advanced Metallic, which gives the appearance of woven metal. The rich assortment of finishes offers unique solutions to enhance any environment—with the warmth of woodgrain, the subtle texture of traditional Japanese washi paper, and abstract designs inspired by nature.

The 3M DI-NOC E-Series Whiteboard Finishes can be used to refresh existing whiteboards or install a new whiteboard on flat or gently curved surfaces. 3M DI-NOC Whiteboard Finishes are easy to install and work with most erasable markers.

Use	<b>Architectural Finishes</b>
Content	<b>100% Vinyl</b>
Backing	<b>Acrylic Pressure-sensitive Adhesive</b>
Cleaning	<b>Water-based (W)</b>
Weight	<b>9.6 ounces/linear yard</b>
Width	<b>48 inches</b>
Flammability	<b>ASTM E 84 Adhered Class A</b>
Abrasion	<b>7000 Taber cycles</b>
Standards & Certs	<b>CA 01350</b>
Sustainable Logistics	<b>Ships Carbon Neutral *</b>
Warranty	<b>3 years</b>

### Exterior Series

3M DI-NOC Architectural Finishes for exterior use include 24 standard stock patterns, with woodgrain, metallic, single color and abstract designs. This exterior architectural cladding material offers a range of innovative designs that surpass the decorative effects that can be achieved with traditional solutions, such as plain metal panels, paint, brick, stone or glass.

Potential applications for the 3M DI-NOC Exterior Series include the renovation of branded environments, such as storefronts, awnings, drive-up banking, signs, walls and other architectural features. This unique material provides no-mess installation with consistent finishes, and the ease of application offers savings due to the speed of renovation and reduced downtime for the business.

The 3M DI-NOC Exterior Series offers impressive durability, with up to seven-year warranty, depending upon the climate conditions of the installation environment.
