

Total System Warranty With TRIANGLE DIGITAL INX Co.

Arlon warrants that Arlon brand DPF Series Films will perform and provide “outdoor durability” (1) for the period stated in the corresponding Technical Bulletin from the date of application under normal vertical exposure conditions provided that the films is properly stored and is applied within one year of the original shipment date from Arlon. This warranty is contingent on the material being processed using only Triangle Digital INX VUV series ink, premask, and associated processing materials in accordance with recommended written processing instructions, and being applied to properly prepared surfaces and cleaned and maintained in accordance with recommended application procedures.

Outdoor durability for the purpose of this warranty is defined as no appreciable deterioration in product when viewed from its intended viewing distance. Premature failure due to cracking, crazing, blistering, or loss of adhesion shall constitute a breach of warranty if it occurs during the warranty period. Replacement graphics will be warranted for the period corresponding to the remaining warranty period of the original failed graphics. Slight color fading, chalking, edge lifting, tenting around rivets, or slight reduction in gloss or reflectivity will not materially detract from appearance and does not constitute a breach of warranty. In the event a breach of warranty occurs as defined above, Arlon’s sole liability is outlined below.

A. Warranty Against Processing Failure

Replacement of film and processing components in an amount equal to the value of the materials that failed during processing. It is the graphic manufacturers responsibility to perform incoming raw materials quality inspections (keeping unconverted samples and lot numbers), to implement appropriate manufacturing process controls including in-process testing retain converted samples, and to immediately cease using and notify Arlon of any materials deemed defective.

B. Limitation of Warranty

Notification of Claim

This warranty requires that Arlon be notified in writing of any claims within fourteen days of material failure. Claim notifications must include name and lot numbers for films and processing components, report of processing conditions and in-process test results, finished decal retain samples, installation date and location, name of installer, and any other pertinent information requested by Arlon. Arlon reserves the right to inspect all reported claims. Failure to comply constitutes a waiver of all rights under this warranty. This warrant applies to Arlon specified graphics programs only. Contact your Sales Representative for further details.

Application to glass

Arlon accepts no liability for glass breakage. Glass is prone to break under the stresses caused by temperature changes across the surface, which could be amplified by the application of vinyl film.

Misuse and Force

Arlon has no obligations under this warranty with respect to products that have been modified or damaged through misuse, abuse, accident, neglect or mishandling by purchaser or purchaser's customer. For example, unless specifically claimed in a Technical Bulletin, graphics are not warranted against premature failure caused by chemical or mechanical means such as, but not limited to vandalism, cleaning solutions, paints, solvents, improperly used high pressure washing equipment, mechanical washing equipment, engine fuel spills, engine exhaust, steam, organic solvents or other spilled chemicals. Graphics applied to unsound surfaces or surfaces that subsequently crack, peel, outgas, or become damaged beneath the graphic are not warranted for performance. Damage from fire, structural failure, lightning, and other such events are not covered.

Unintended use of Products

Arlon products covered by this warranty are intended only for use by professional users and only for the intended uses as described in the corresponding Arlon Technical Bulletin. Before using for any other application, user shall determine the suitability of the product for its intended use and user assumes all risk and liability in connection therewith.

In no event shall Arlon be liable for any incidental or consequential damages including, but not limited to, loss of profit, loss of use or production or loss of capital. Arlon's liability on any claim of any kind shall in no case exceed the amount expressly provided for in this warranty. This limitation applies regardless of whether the damages are sought based on breach of warranty, breach of contract, negligence, strict liability in tort or any other legal theory.

- (1) Outdoor durability for the following extremely severe areas will be two years less than the durability published in the appropriate technical bulletin: southern Florida, AZ, NV, NM, UT, southwest Texas, Southern California, Mexico, or other similar latitudes.
- (2) **Triangle Digital VUV series inks provide good wetting and anchorage properties under controlled laboratory and shop conditions. Testing showed positive results for print, adhesion, physical properties, and shrinkage. These inks are approved by Arlon and are covered by this warranty.**
- (3) If the stated durability of an approved allied component (ink, toner, clear coat) differs from that of the Arlon material the finished graphics will be warranted for a period equal to the stated durability of the least durable component.
