3M™ Cooling Film
Reduces
interior vehicle
temperatures
by up to **10°F**
(5.5°C)

3M™ Cooling Film

When you apply 3M™ Cooling Film to the roof of a last mile vehicle, it reduces heat buildup at the source.

This highly reflective performance film is engineered to keep vehicles cooler without external power, improving driver comfort and helping reduce heat exposure to temperature-sensitive cargo.

Minimal maintenance is needed to sustain performance, as the durable coating resists dirt, chemicals and wear in normal operating conditions.

Reflects over
85%
solar radiation

Releases
heat
naturally

Key Benefits

Helps improve driver comfort by reducing interior temperatures by up to 10°F (5.5°C)

Quick installation minimizes downtime

Limits heat exposure to temperature-sensitive cargo

Enables smoother routes by reducing heat-related slowdowns during frequent stop-and-go deliveries

Sturdy coating resists the elements and maintains high reflectivity that lasts

Backed by a 5-year warranty
