## Durability & Limited Warranty

### Durability Guidelines:

The following chart provides the anticipated durability for vertical and horizontal surfaces by product type. This chart is for guidance only and applies to CheetahPCC's normal use and service.

Type of CheetahPCC	Vertical Surfaces	Horizontal Surfaces
Black & White	10 Years	10 Years
Gloss Colors	10 Years	7 Years
Matte & Satin	10 Years	6 Years

Many factors affect durability including defects or damages attributable to improper installation and/or application, improper care and maintenance, or the following:

- CheetahPCC applied to non-OEM paint or clear-coat substrates.
- CheetahPCC applied to uncured or un-dried paint that has poor bond to the substrate or underlying paint coatings.
- CheetahPCC applied to glass surfaces. CheetahPCC is not liable for any glass breakage.
- CheetahPCC applied to uncoated/unpainted stainless-steel surfaces.
- Removal from uncured or un-dried paint.
- Removal from substrates with aged paints, oxidation, or chalking.
- Application to any surface with low surface energy (such as many plastics or gel coated marine surfaces). Substrates with dyne values of less than 30 dynes/cm are considered low surface energy.
- Substrates exposed to water submersion, such as watercraft or any other marine application.
- Use of different rolls of CheetahPCC per vehicle resulting in color variation. Color appearance may vary roll-to-roll.
- If harmful solvents are used to clean the product, or if the product is painted or coated in any way with non-approved "aftermarket" products.
- If direct heat is used, burning or bruising the surface.
